EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas D. Merritt on March 22, 2007. The application has been amended as follows:

IN THE CLAIMS:

Claim 1-8 (Cancelled).

Claim 9 (New). A flue gas conversion apparatus comprising, in combination:

- (a) a carbon dioxide laser for the purpose of creating a laser beam;
- (b) a plurality of catalytic conversion means for producing a converted flue gas, each of said means including at least one fluid inlet for receiving a flue gas and at least one fluid outlet for discharging the converted flue gas;
- (c) a means to split said laser beam into a plurality of beams, whereby at least one element of said split beam is directed to each of said plurality of catalytic conversion means, thereby causing a substantial temperature increase of said catalytic conversion means; and
- (d) a chemical combining means disposed in fluid communication with said fluid outlets of said plurality of catalytic conversion means, wherein the converted flue gas produced in each of said plurality of catalytic conversion means is chemically combined in said chemical combining means, to thereby produce a fuel product.

Claim 10 (New). The flue gas conversion apparatus in claim 9, wherein said carbon dioxide

Art Unit: 1764

laser is a flowing gas carbon dioxide laser, and wherein said laser includes a fluid inlet and a fluid outlet, whereby gaseous carbon dioxide is permitted to enter said laser, flow through said laser, and exit said laser.

Claim 11 (New). The flue gas conversion apparatus in claim 10, further comprising fluid interconnection means for permitting said fluid outlet of said laser to interconnect with at least one of said fluid inlets of said catalytic conversion means, whereby said flowing gas of said laser is first utilized as a medium for creating said laser beam, and said medium is subsequently utilized as a reactant in said catalytic conversion means.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer A. Leung whose telephone number is (571) 272-1449. The examiner can normally be reached on 9:30 am - 5:30 pm Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn A. Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
